

MASTER REACT DEVELOPMENT

Learn by building 30+ practical projects - from foundational concepts to advanced architectures.

Perfect for developers at every skill level.

Projects

Basic Level Projects

React Fundamentals:

1. Counter App
2. To-Do List
3. Digital Clock
4. Weather App (Static)

Interactive UI:

1. Color Picker
2. Calculator
3. Form Validation App
4. Quote Generator

Visual & Structural:

1. Image Gallery Viewer
2. Accordion/FAQ Component

Intermediate Level Projects

API Integration:

1. Weather App (Live API)
2. Movie Search App
3. Recipe Finder

Data & Routing:

1. CRUD App with LocalStorage
2. Blog App with Routing
3. Expense Tracker

Advanced Features:

1. Authentication UI
2. Chat App (Real-Time)
3. Shopping Cart App
4. Theme Switcher App

Advanced Level Projects

Complex Systems:

1. E-Commerce Platform
2. Project Management Dashboard
3. Video Streaming App

AI & Social:

1. AI Chatbot Interface
2. Social Media App

React Native Basic Projects

1. BMI Calculator App
2. Flashlight App
3. Currency Converter
4. Notes Taking App
5. QR Code Scanner App

Basic Level Projects: React Fundamentals

These projects are perfect for beginners, focusing on core React concepts like components, props, state, and event handling.

1

Counter App

Increment, decrement, and reset buttons with state updates.

2

To-Do List

Add, delete, and mark tasks as complete.

3

Digital Clock

Display real-time clock using setInterval.

4

Weather App (Static)

Fetch and display static weather data with basic UI.

Basic Level Projects: Interactive UI

1

Color Picker

Pick a color and dynamically change the background.

2

Calculator

Basic arithmetic operations using button inputs.

3

Form Validation App

Input fields with live validation messages.

4

Quote Generator

Display a random quote on button click.

Basic Level Projects: Visual & Structural

1

Image Gallery Viewer

Show a grid of images with click-to-enlarge feature.

2

Accordion/FAQ Component

Expand/collapse sections using state toggling.

Intermediate Level Projects: API Integration

These projects involve routing, APIs, hooks, state management, and component lifecycles.

Weather App (Live API)

Fetch real-time data using OpenWeather API.

Movie Search App

Use OMDB API with search and detailed views.

Recipe Finder

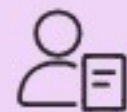

Search for meals using Edamam or Spoonacular API.

Intermediate Level Projects: Data & Routing

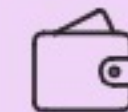

CRUD App with LocalStorage

Add, edit, delete, and store data in browser storage.

Blog App with Routing

Multiple pages: home, blog post, create/edit posts.

Expense Tracker

Track income/expenses, show total balance, charts.

Intermediate Level Projects: Advanced Features

Authentication UI

Sign-up, login, logout using Firebase Auth.

Chat App (Real-Time)

Send and display real-time messages with Firebase.

Shopping Cart App

Add/remove items, update quantities, calculate total.

Theme Switcher App

Toggle themes using context API and local storage.

Advanced Level Projects: Complex Systems

These projects involve advanced hooks, performance optimization, testing, external libraries, and architecture.

E-Commerce Platform

Product listings, filtering, cart, checkout, payments.

Project Management Dashboard

Drag-and-drop tasks, user assignment, progress tracking.

Video Streaming App

Video player, search, subscriptions, upload feature.

Advanced Level Projects: AI & Social

AI Chatbot Interface

Integrate with OpenAI API for persistent chat history.

Social Media App

Posts, likes, comments, profiles, friend requests.

React Native Basic Projects

A fresh set of 5 projects for React Native beginners, focusing on mobile-specific features.

BMI Calculator App

Input height/weight, calculate BMI, show message.

Flashlight App

Toggle device flashlight on/off.

Currency Converter

Convert between currencies using static rates.

Notes Taking App

Add short text notes and display in a scrollable list.

QR Code Scanner App

Scan QR codes and display decoded text.
